CORRIGENDUM

A corrected Table 4 was inadvertently omitted during production of the paper entitled "Snow Particle Size Spectra in Lake Effect Snows," by R. R. Braham, Jr., which appeared in *J. Appl. Meteor.*, Vol. 29, No. 3, 200–207. The corrected version of Table 4 is reproduced below.

This table gives distribution parameters (zero intercept, N_0, and slope, λ), coefficient of determination (R^2), particle concentration, ice water content (IWC), radar reflectivity factor (Z_e), and melted diameter of particle having mean mass (D_m) for 49 size spectra measured in lake-effect snows. Sample volume, particle counts and concentrations of particles measured by the 2D-C and 2D-P probes, for the same time period, are included for comparison. See original article for further details.

Table 4. Distribution parameters and other data for 49 snow spectra.

Date and Time	N_0	λ	R^2	Conc.	IWC	Z_e	D_m	2D-C			2D-P
