Figure 1 in Whiteman et al. (1999, p. 1119) shows the locations of 15 wind measurement sites. The published figure shows station numbers rather than the desired three-letter station identifiers. The correspondence between the station numbers and the station identifiers is given in Table 1. A grayscale version of the desired figure with station identifiers can be found in Lindsey et al.'s (1999, p. 1034) Fig. 1, but the positions of BUL and DNG have been incorrectly switched in that figure.
