British Columbia, Canada*

In Grimmond and Oke (1999), we inadvertently misstated Eqs. (10) and (15). The equations should appear as follows:

Ba₀ is

$$z_0 = (\bar{z}_H - z_d) \exp \left[- \frac{0.4}{\left(0.5 \frac{\sum C_{db} L_{y,ib} z_{H_{ib}} + \sum C_{dt} L_{y,it} z_{H_{it}}}{A_T} \right)^{0.5}} \right] \quad (10)$$

and Ra_d is

$$\frac{z_d}{\bar{z}_H} = 1 - \left\{ \frac{1 - \exp[-(c_{d1} 2\lambda_F)^{0.5}]}{(c_{d1} 2\lambda_F)^{0.5}} \right\}. \quad (15)$$

All terms are defined in Grimmond and Oke (1999). These errors are typographical and do not affect the content of the paper.
