

CORRIGENDUM

Authors W. J. Emery, W. Lee, W. Zenk and J. Meincke have noted an error in Eq. (1) on p. 78 of their article, "A Low-Cost Digital XBT System and its Application to the Real-Time Computation of Dynamic Height" in the January 1986 issue of *J. Atmos. Oceanic Technol.*, 3(1), 75-83.

The resistance to temperature relation $T = f(R)$ should read

$$T = (1.34079 \times 10^{-3} + \ln(R) \times (2.1604 \times 10^{-4} + \ln(R) \times 2.38522 \times 10^{-6}))^{-1} - 273.15 \quad (1)$$

where
