**THE STATE OF THE SOCIETY.**

The printers' strike, the Secretary's change of position and of headquarters, and the usual summer dullness, combined to bring the Society's activities practically to a standstill for several months. The Secretary is settled at Clark University, Worcester, Mass., and has obtained the aid of two graduate students and the services of a stenographer. With a central office ready to handle business with dispatch, the various committees can be assured of prompt attention to their needs. The BULLETIN will make up lost time by appearing every two or three weeks for the rest of the year.

---

**NOTICE TO STUDENTS OF METEOROLOGY AND CLIMATOLOGY.**

A fellow of the American Meteorological Society has agreed to supply funds "to be used as honoraria for meteorological and climatological contributions, reviews, abstracts, notes, etc., written by students in American colleges and universities and published in the October 1921, and later issues of the *Monthly Weather Review* or BULLETIN OF THE AMERICAN METEOROLOGICAL SOCIETY. 1 cent a word will be paid for original articles, and  $\frac{1}{2}$  cent a word for reviews, abstracts and notes, except for those of books or articles not in English, for which the rate will be 1 cent. The principal objects are, to supply enough reviews and abstracts to cover adequately the meteorological contributions published the world over, and to help students of meteorology and climatology to pursue their courses."

Manuscripts for publication in the *Monthly Weather Review* should be submitted to "Chief, U. S. Weather Bureau, Washington, D. C." and those for the BULLETIN, to "Secretary, American Meteorological Society, Clark University, Worcester, Mass."

Teachers of meteorology and climatology should bring this to the attention of their classes.

---

**COMMITTEE ON MARINE METEOROLOGY.**

A meeting of the Marine Committee of the American Meteorological Society was held at Washington, D. C., on April 29, 1921, to consider general matters relating to ocean meteorological work. There were present the Chairman, Mr. F. G. Tingley, Col. E. Lester Jones, Dr. G. W. Littlehales, Capt. F. A. Young, Mr. J. H. Kimball and Dr. C. F. Brooks, the latter at the invitation of the Committee for the purpose of presenting a program covering certain measures of coöperation in oceanographic and meteorological investigations.
