MARCH, 1924.

No. 3.

WASHINGTON MEETING OF THE SOCIETY

The annual spring meeting of the Society will be held in Washington, D. C., at the Central Office of the Weather Bureau, probably on Tuesday, April 29. The date will be definitely announced in the next BULLETIN. This meeting will probably consist of two sessions, both in the daytime, instead of one in the afternoon and one in the evening as has been the case in past years. Facilities have now been provided for the holding of day-time sessions in which the lantern is required.

All members of the Society desiring to present papers at this meeting will kindly send titles and abstracts to the Secretary, at Clark University, Worcester, Mass., not later than April 5, in order that the full announcement of the program may appear in the April BULLETIN. A Secretary pro tem, Dr. C. L. Meisinger, has been appointed at the Central Office in Washington, and titles and abstracts may be given directly to him by those at that office.

MINUTES OF THE CINCINNATI MEETING

(Continued from February BULLETIN, page 31)

Luncheon Presented by Chamber of Commerce

At noon all those at the meeting were handed complimentary tickets and quickly transported in 12 automobiles furnished by business men of Cincinnati, to the Chamber of Commerce. Fifty-two enjoyed the excellent luncheon arranged by W. C. Culkins, Executive Vice-President, and James A. Reilly, President Coal Dealers' Association. Mr. W. C. Devereaux, as toastmaster, first introduced Mr. A. Julius Freiberg, Vice-President of the Cincinnati Chamber of Commerce. Mr. Freiberg extended the guests a most cordial welcome on behalf of the Chamber. Then after briefly remarking on his personal contacts with Meteorology at Harvard through Professor W. M. Davis, and Dr. T. A. Jaggar, Jr., of whom the latter was present, Mr. Freiberg showed that the Cincinnati Chamber of Commerce not only had been strongly interested in meteorology for over 50 years, but had in 1869 financed the first telegraphic collection of reports for weather forecasting. Mr. Freiberg then requested Mr. W. C. Devereaux, as member of the Chamber of Commerce, the American Meteorological Society and local representative of the Weather Bureau, to act as toastmaster. Mr. Devereaux remarked that the business men of the "Queen City of the West" were greatly surprised to hear that river transportation had passed from the "Beautiful Ohio" with the passing of the ox-cart. He suggested that anyone desiring reliable infor-
