The deadline for advertising insertion orders is the 15th, two months prior to date of issue. Orders received after deadline are subject to space availability. Deadline for copy and/or plate is the 1st day of month, one month prior to date of issue. For advertising information contact: Evelyn Mazur, American Meteorological Society, 45 Beacon Street, Boston, Mass. 02108. Tel. 617-227-2425.

employment announcements

The American Meteorological Society issues employment announcements monthly, setting forth opportunities for positions in the atmospheric and oceanographic fields. The employers describe the prerequisites and requirements for the openings.

Members and nonmembers of the AMS may subscribe to the announcements. The subscription price for twelve monthly issues is \$3 per annum for AMS members and \$12 per annum for non-members (AMS student members free).

The purpose of the Employment Bulletin is to provide a means by which those seeking positions in the atmospheric and related fields and those requiring personnel to fill such openings may have a convenient means of communication. Organizations that wish to avail themselves of this service should contact the American Meteorological Society for details and charges.

PREPRINT VOLUME

CONFERENCE ON ATMOSPHERIC RADIATION

AMERICAN METEOROLOGICAL SOCIETY

August 7–9, 1972

Ft. Collins, Colo.

Preprints of approximately seventy papers presented at the AMS Conference on Atmospheric Radiation, August 7–9, 1972 at Colorado State University, Ft. Collins, Colorado are available in a bound volume.

The conference discussions were concerned with all aspects of radiative energy exchanges in the atmosphere, including special problems of satellite observations and their interpretation.

The large number and wide scope of papers contained in this volume will contribute toward a better understanding of the role of radiation in our atmosphere, its processes and effects.

Topics include:

- Radiative Transfer in Realistic Atmospheres**
- Radiative Properties (Theoretical and Experimental)**
- Instrumentation and Measurements**
- Radiative Energy Budgets (Pt. 1)**
- Radiative Energy Budgets (Pt. 2)**
- Radiation Interaction in Fluid Dynamic Systems**

320 pages

\$15 AMS Members
\$20 Nonmembers
