## employment announcements

The American Meteorological Society issues employment announcements monthly, setting forth opportunities for positions in the atmospheric and oceanographic fields. The employers describe the prerequisites and requirements for the openings.

Members and nonmembers may subscribe to the announcements. The subscription price for a calendar year (12 monthly issues) is \$6 for AMS Members and Associate Members, \$3 for AMS Student Members, and \$25 for nonmembers (add \$10 for mailing to a foreign address; monthly issues will be sent via air mail). After July 1, half-year subscriptions (for July through December issues) are available at one half of the above annual prices.

The purpose of the Employment Announcements is to provide a means by which those seeking positions in the atmospheric and related fields and those requiring personnel to fill such openings may have a convenient means of communication. Organizations that wish to avail themselves of this service should contact Jean Cooper, American Meteorological Society, 45 Beacon Street, Boston, Mass. 02108 (617-227-2425), for details and charges. •

## Eighth Conference on Weather Forecasting and Analysis

June 10-13, 1980

Denver, Colo.

The Eighth Conference on Weather Forecasting and Analysis, sponsored jointly by the American Meteorological Society and the National Weather Association, was held 10-13 June 1980 in Denver, Colo. The cooperation of these national organizations reflects the growing awareness of the scope, the complexities, and the tremendous importance of Weather Services to our nation and to the entire world. More than 80 papers are contained in the preprint volume and are arranged under the following session topics:

- \* Statistical Forecast Techniques
- \* Case Studies
- \* Satellite Applications
- \* Data Acquisition and Analyses
- \* Climatology and Long-Range Forecasts
- \* Specialized Analysis and Forecast Models
- \* Operational Forecast Models
- \* General Topics
- \* Local and Regional Forecast Problems
- \* Atmospheric Processes
- \* Verification and Evaluation
- \* Applied Forecast Problems
- \* Forecasting—General

500 pages

\$15 AMS Members

\$20 Nonmembers

(add \$2.00 postage & handling)
