# SEVERE CONVECTIVE STORMS

METEOROLOGICAL MONOGRAPH No. 50

Edited by Charles Doswell III

This volume is a collection of 13 review papers by a distinguished group of scientists, providing a summary of the current scientific understanding of convective storms and the weather they produce, as well as showing how that understanding works in forecasting practice. The volume is loaded with outstanding illustrations, and is destined to become one of the most widely referred-to books on convection and convective processes.
