(Manuscript received 2 January 2019, in final form 25 February 2019)

A typo was included in Eq. (2) of [Garfinkel et al. \(2013\)](#), [Garfinkel and Waugh \(2014\)](#), and [Garfinkel and Harnik \(2017\)](#). The equation should read as follows:

$$\delta T_{\text{new}} = \delta T_{\text{HS94}} + A \cos[2(\phi - 45)]P(\phi) + B \cos[2(\phi - 45)]\sin[3(\phi - 60)] \left\{ \exp \left[-\frac{(\phi - 50)^2}{2 \times 15^2} \right] + \exp \left[-\frac{(\phi + 50)^2}{2 \times 15^2} \right] \right\}. \quad (2)$$

All modeling experiments in [Garfinkel et al. \(2013\)](#), [Garfinkel and Waugh \(2014\)](#), and [Garfinkel and Harnik \(2017\)](#) were forced with δT_{new} as formulated here, and hence this error did not affect the results or conclusions of any of the three original papers. Note that the last term on the right-hand side of the equation leads to a temperature perturbation in the midlatitudes near 50°, and not at 15° as was mistakenly written.

Acknowledgments. We thank Huang (Caesar) Yang for notifying us about this error.
