TOBIAS GERKEN

Department of Land Resources and Environmental Sciences, Montana State University, Bozeman, Montana, and Department of Meteorology and Atmospheric Science, The Pennsylvania State University, University Park, Pennsylvania

ANDREAS F. PREIN

National Center for Atmospheric Research, Boulder, Colorado

PAUL C. STOY

Department of Land Resources and Environmental Sciences, Montana State University, Bozeman, Montana, and Department of Biological Systems Engineering, University of Wisconsin–Madison, Madison, Wisconsin

Figure 2 in [Bromley et al. \(2020\)](#) contained the wrong units for the temperature trends. The authors regret that this error passed through the editing process. [Figure 2](#) below shows the correct units. No change to the results or the representation of trends occurred in this updated [Fig. 2](#).

Acknowledgments. The National Center for Atmospheric Research is sponsored by the National Science Foundation.

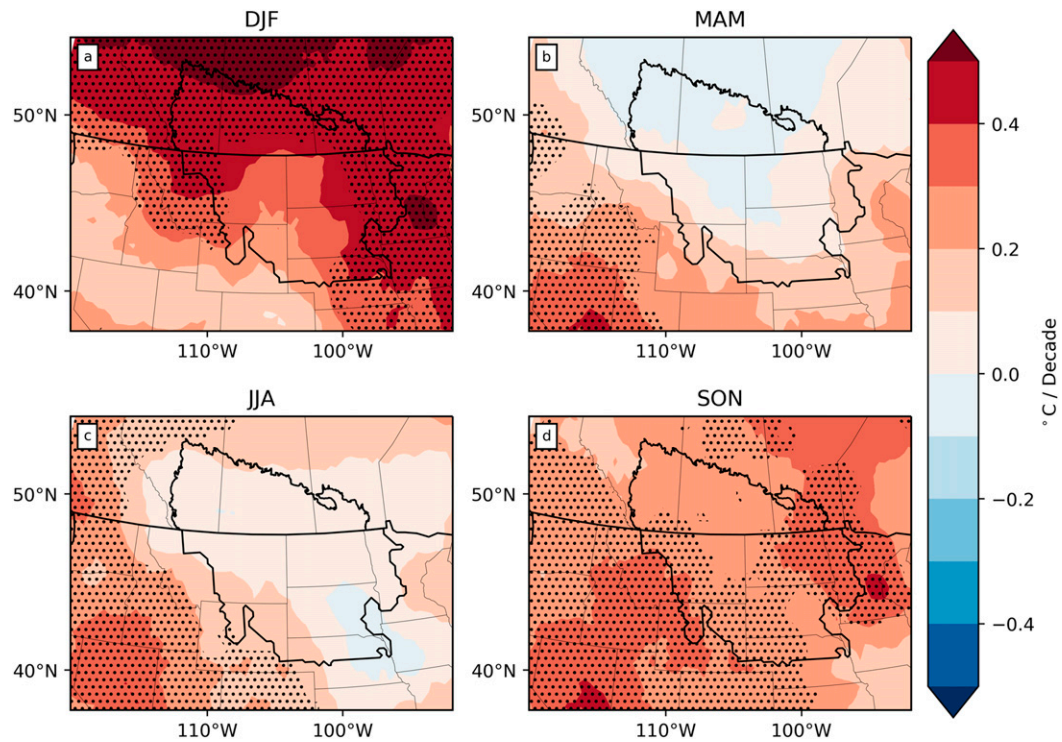

FIG. 2. Trends in 2-m air temperature T_{air} from 1970 to 2015 across the NNAGP and surrounding regions. Stippling indicates a significant trend at $p < 0.05$ after correcting for autocorrelation [Eq. (1)] against a null hypothesis of no trend.
