(Manuscript received 12 August 2022, in final form 31 August 2022)

In Chen and Wang (2018), we have become aware of two typos in the equations for calculating the centroid frequency and centroid longitude. The correct equation for calculating the centroid frequency should be $f_c = \frac{1}{30\text{days}} \int_{-90\text{days}}^{1/30\text{days}} S(f) \, df$, instead of $f_c = \frac{1}{90\text{days}} \int_{-90\text{days}}^{1/90\text{days}} S(f) \, df$. The correct equation for calculating the centroid longitude should be $x_c = \frac{180^\circ}{180^\circ} A(x) \, dx / \int_{180^\circ}^{180^\circ} A(x) \, dx$, instead of $x_c = \int_{180^\circ}^{180^\circ} A(x) \, dx / \int_{180^\circ}^{180^\circ} x \, dx$.

These two typos did not affect the results shown in Figs. 2 and 4, as those results are calculated using the correct equations.
