

## CORRIGENDUM

ALEX J. CANNON

*Meteorological Service of Canada, Vancouver, British Columbia, Canada*

(Manuscript received and in final form 10 March 2011)

---

Cannon (2008) contains typographical errors in section 3b on p. 1289, in Eq. (8) on p. 1290, and in the caption of Table 2 on p. 1293. On p. 1289, the sentence at the end of the first complete paragraph should read as follows: “The mean value of the distribution is  $\mu^{(B)} = p\alpha\beta$  and the variance is  $s^{(B)} = p\alpha[1 + (1 - p)\alpha]\beta^2$ .” In the original paper, division operators were mistakenly included in the expressions for the mean and variance. On p. 1290, the  $g_k$  function should be omitted from Eq. (8). Finally, the caption for Table 2 on p. 1293 should include the sentence: “rmse and  $r$  indicate, respectively, the root mean squared error and correlation coefficient between observed values and the predicted conditional mean; the subscript  $s$  refers to values calculated for the spatial mean over the 10 stations.”
