Laboratory for Climate Studies, National Climate Center, CMA, Beijing, China

Figure 3 of Ren et al. (2011), which appeared on p. 604, was incorrectly published. Instead of the region-averaged temperature anomaly time series, a figure containing the region-averaged seasonal precipitation anomalies was mistakenly published. The correct Fig. 3 as it should have appeared is shown below.

The authors regret any inconvenience this error may have caused.

Ren, G., H. Liu, Z. Chu, L. Zhang, X. Li, W. Li, Y. Chen, G. Gao, and Y. Zhang, 2011: Multi-time-scale climatic variations over eastern China and implications for the South–North Water Diversion Project. *J. Hydrometeorol.*, **12**, 600–617.

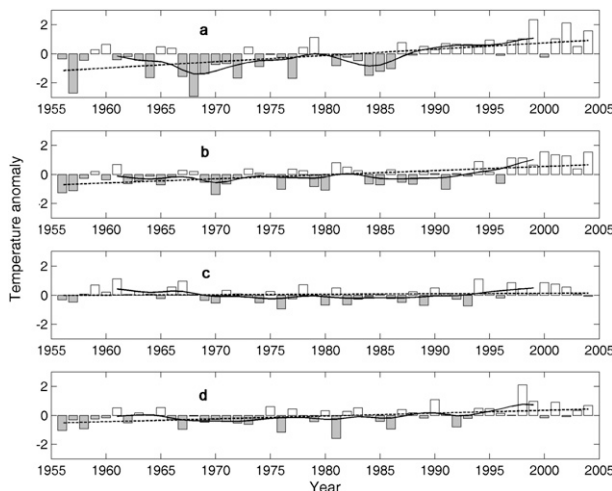

FIG. 3. Change in regional average seasonal mean temperature anomalies ($^{\circ}\text{C}$) over the EC region from 1956 to 2004. The dashed line indicates linear trend and the curved line indicates the 11-yr Gaussian smoothed series for (a) winter, (b) spring, (c) summer, and (d) autumn.
