

# Monthly Weather Review

MONTHLY WEATHER REVIEW (*MWR*) publishes research relevant to the analysis and prediction of observed atmospheric circulations and physics, including technique development, data assimilation, model validation, and relevant case studies. This research includes numerical and data assimilation techniques that apply to the atmosphere and/or ocean environments. *MWR* also addresses phenomena having seasonal and subseasonal time scales.

## Chief Editor

DAVID M. SCHULTZ  
University of Manchester

## Editors

JEFFREY ANDERSON  
National Center for Atmospheric Research

TOMMASO BENACCHIO  
Politecnico di Milano

KRISTEN L. CORBOSIERO  
University at Albany, State University of  
New York

MATTHEW D. EASTIN  
University of North Carolina at Charlotte

CLARK EVANS  
University of Wisconsin-Milwaukee

JIDONG GAO  
NOAA/National Severe Storms Laboratory

JOSHUA P. HACKER  
National Center for Atmospheric Research

DANIEL HODYSS  
Naval Research Laboratory

DARYL KLEIST
