The following extracts relating to the general weather conditions in the several States and Territories are taken from the monthly reports of the respective sections of the Climate and Crop Service. The name of the section director is given after each summary.

Rainfall is expressed in inches.

**Alaska.**—The mean temperature was 31.5°, or about normal; the highest was 53.2°, at Denali on the 14th, 19th, and 23rd, and the lowest, 5.6°, at Anchorage on the 1st. The average precipitation was 0.21, or 0.17 below normal; the greatest monthly amount, 0.51, occurred at Anchorage on the 30th.

**Arizona.**—The mean temperature was 81.9°, or about normal; the highest was 106°, at Tucson on the 1st, and the lowest, 40°, at Winslow on the 26th. The average precipitation was 0.74, or 0.38 above normal; the greatest monthly amount, 2.28, occurred at Flagstaff on the 20th.

**California.**—The mean temperature was 68.1°, or 1.5° below normal; the highest was 93°, at Palmdale on the 4th, and the lowest, 42°, at San Francisco on the 3rd. The average precipitation was 2.43, or 1.8° below normal; the greatest monthly amount, 5.74, occurred at San Diego on the 1st.

**Colorado.**—The mean temperature was 45.9°, or about normal; the highest was 80°, at Pueblo on the 4th, and the lowest, 20°, at Cheyenne on the 20th. The average precipitation was 0.20, or 0.20 below normal; the greatest monthly amount, 0.30, occurred at Cheyenne on the 24th.

**Florida.**—The mean temperature was 72.2°, or about normal; the highest was 93°, at DeLand on the 4th, and the lowest, 51°, at Tallahassee on the 5th. The average precipitation was 0.45, or 0.38 below normal; the greatest monthly amount, 0.61, occurred at Tallahassee on the 30th.

**Georgia.**—The mean temperature was 82.2°, or about normal; the highest was 101°, at Albany on the 17th, and the lowest, 60°, at Columbus on the 30th. The average precipitation was 3.74, or 0.20 above normal; the greatest monthly amount, 9.64, occurred at Tallahassee, and the least, 0.71, at Charleston. **-C. E. Linney.**

**Indiana.**—The mean temperature was 75.8°, or about normal; the highest was 101°, at Fairmount on the 23rd, and the lowest, 42°, at Columbia City. The average precipitation was 3.38, or 0.15 above normal; the greatest monthly amount, 6.00, occurred at Scottsburg, and the least, 0.55, at Vevay. **-C. F. R. Waggensap.**

**Iowa.**—The mean temperature was 73.1°, or about normal; the highest was 101°, at De Soto on the 23rd, and the lowest, 38°, at Mason City on the 30th. The average precipitation was 3.07, or about normal; the greatest monthly amount, 9.06, occurred at Lenox, and the least, 0.72, at Winterset. **-A. W. Sager, Director; G. M. Chappel, Assistant.**

**Kansas.**—The mean temperature was 72.8°, or 1.9° below normal; the highest was 106°, at Ulysses on the 7th, and the lowest, 45°, at Russellville on the 8th. The average precipitation was 5.12, or 1.79 above normal; the greatest monthly amount, 11.14, occurred at Independence, and the least, 1.21, at Medicine Lodge. **-T. B. Jennings.**

**Kentucky.**—The mean temperature was 77.1°, or about normal; the highest was 100°, at Princeton and Shelbyville on the 15th, at Paducah and Williamsburg on the 16th, and at Bardstown on the 17th; the lowest, 47°, at Loretto on the 10th. The average precipitation was 3.78, or 0.72 below normal; the greatest monthly amount, 7.41, occurred at Rockland on the 23rd, and the least, 0.97, at Lexington. **-W. H. Hersey.**

**Louisiana.**—The mean temperature was 82.7°, or 0.6° above normal; the highest was 105°, at Liberty Hill on the 31st, and the lowest, 54°, at North Louisiana Experiment Station, Calhoun, on the 5th. The average precipitation was 7.30, or about normal; the greatest monthly amount, 9.54, occurred at Sugar Experiment Station, and the least, 0.37, at Minden. **-W. T. Byrtes.**

**Maryland and Delaware.**—The mean temperature was 76.3°, or about normal; the highest was 100°, at Boeckelville, Boonsboro, and Cockeysville, Md., on the 23rd, and the lowest, 27°, at Deerpark, Md., on the 21st. The average precipitation was 4.33, or 0.07 below normal; the greatest monthly amount, 8.37, occurred at Seacoast, Del., and the least, 0.03, at Smithfield, Md. **-P. J. Wake.**

**Michigan.**—The mean temperature was 68.4°, or 1.2° below normal; the highest was 100°, at Battle Creek on the 20th and the lowest, 30°, at Rockland on the 31st. The average precipitation was 3.63, or 1.12 above normal; the greatest monthly amount, 1.12, occurred at Big Rapids, and the least, 0.80, at Newberry. **-F. C. Schmeller.**

**Minnesota.**—The mean temperature was 70.2°, or about normal; the highest was 100°, at Milaca on the 12th and at Beardsley on the 19th, and the lowest, 30°, at Towler on the 16th, at Mount Iron on the 26th, and at Roseau on the 30th. The average precipitation was 2.61, or about 0.50 below normal; the greatest monthly amount, 9.68, occurred at New Fenton, and the least, 0.47, at New Ulm. **-T. S. Outram.**

**Mississippi.**—The mean temperature was 81.3°, or about normal; the highest was 103°, at Westpoint on the 14th, 17th, and 18th, and the lowest, 63°, at Okoloma on the 31st. The average precipitation was 4.89, or about 1.00 above normal; the greatest monthly amount, 10.49, occurred at Vicksburg, and the least, 0.24, at E. W. Wildes. **-W. E. Wildes.**

**Missouri.**—The mean temperature was 76.1°, or about 1.0° below normal; the highest was 102°, at Princeton on the 25th and at Vichy on the 27th, and the lowest, 45°, at Potosi on the 1st. The average precipitation was 4.89, or about 1.00 above normal; the greatest monthly amount, 9.30, occurred at Conception, and the least, 1.69, at Springfield. **-G. J. O’Connor.**

**Montana.**—The mean temperature was 68.7°, or 0.3° above normal;
the highest was 105°, at Glendive on the 17th, and the lowest, 28°, at Adel on the 1st. The average precipitation was 1.34, or 0.10 above normal; the greatest monthly amount, 5.42, occurred at Glendive, and the least, traces, at Adrian on the 1st. The greatest monthly amount, 10.85, occurred at Salem, and the least, 0.04, at Cody.—G. A. Loveless.

New Mexico.—The mean temperature was 73.0°, or 0.7° below normal; the highest was 106°, at Eddy on the 24th, and the lowest, 39°, at Winsor on the 12th. The average precipitation was 1.11, or 1.26 above normal; the greatest monthly amount, 10.51, occurred at Clayton, and the least, 1.00, at Eddy.—R. H. Hastings.

New York.—The mean temperature was 70.3°, or 0.6° above normal; the highest was 101°, at Cedar Hill on the 3d, and the lowest, 33°, at Bolivar and on the 3d and at Lake Forest on the 25th. The average precipitation was 3.72, or 0.17 below normal; the greatest monthly amount, 10.19, occurred at Fort Jervis, and the least, 0.70, at Madison Barracks.—R. G. Allen.

Ohio.—The mean temperature was 67.5°, or 1.0° below normal; the highest was 102°, at Rockingham and Salisbury on the 14th, and the lowest, 40°, at Linnville on the 1st. The average precipitation was 0.61, or 0.90 above normal; the greatest monthly amount, 12.15, occurred at Seaford, and the least, 0.22, at Marion.—C. F. von Harnann.

North Dakota.—The mean temperature was 68.3°, or 0.4° below normal; the highest was 109°, at Steele on the 21st, and the lowest, 32°, at Dunseith, on the 29th. The average precipitation was 1.68, or 0.48 below normal; the greatest monthly amount, 6.12, occurred at Sibley, and the least, 0.45, at Bismarck.—B. H. Bronson.

Oklahoma.—The mean temperature was 74.1°, or about normal; the highest was 105°, at Seeman on the 4th, and the lowest, 41°, at Orangeville on the 10th. The average precipitation was 3.70, considerably above normal; the greatest monthly amount, 14.33, occurred at Fort Sill, and the least, 0.35, at Okemah.—H. L. Bull.

Oregon.—The mean temperature was 66.1°, or about normal; the highest was 107°, at Pendleton on the 13th, and the lowest, 30°, at Silverlake on the 1st. The average precipitation was 0.15, or 0.34 below normal, the lowest on record for July, the greatest monthly amount, 1.13, occurred at Stafford, while no rain fell in several counties.—B. S. Payne.

Pennsylvania.—The mean temperature was 72.3°, or 1.0° above normal; the highest was 107°, at Altoona on the 29th, and the lowest, 65°, at Dunmore on the 1st. The average precipitation was 3.91, or nearly normal; the greatest monthly amount, 5.24, occurred at Selinsgrove, and the least, 1.53, at Lewisburg.—T. F. Townsend.

South Carolina.—The mean temperature was 80.0°, or about normal; the highest was 105°, at Columbia, Greenwood, and Little Mountain on the 15th, and the lowest, 47°, at Holland on the 4th. The average precipitation was 4.03, or 1.99 below normal; the greatest monthly amount, 7.58, occurred at Temperance, and the least, 1.58, at Trenton.—W. J. Bauer.

South Dakota.—The mean temperature was 72.4°, or about normal; the highest was 111°, at Interior on the 23rd, and the lowest, 32°, at Iron Springs on the 29th. The average precipitation was 3.03, or about 0.89 below normal; the greatest monthly amount, 6.83, occurred at Canton, and the least, 0.28, at Forestburg. The precipitation was excessive over portions of Bon Homme, Clay, Lincoln, Turner, and Union counties, where the greatest monthly amount reached 3.18, or 0.89 below normal; the greatest monthly amount, 7.58, occurred at Lafayette, and the least, 1.61, at Covington.—H. C. Bates.

Tennessee.—The mean temperature was 77.5°, or about 1.0° above normal; the highest was 101°, at Dover on the 15th and 16th, and the lowest, 44°, at Silverlake on the 9th and 10th and at Erasmus on the 10th. The average precipitation was 7.92, or 0.89 above normal; the greatest monthly amount, 14.00, occurred at Madison on the 16th, and the least, 3.78, or 13.06 below normal, at Jackson, on the 27th. The greatest monthly amount, 7.58, occurred at Lafayette, and the least, 1.61, at Covington.—H. C. Bates.

Texas.—The mean temperature, determined by comparison of 42 stations distributed throughout the State, was 0.6° below the normal; there was a slight excess for the month in a few scattered localities and a general deficiency elsewhere; the highest was 110°, at Desdemona on the 29th, and the lowest, 44°, at Marathon on the 10th. The average precipitation, determined by comparison of 48 stations distributed throughout the State, was 0.44 above the normal. There was a general excess ranging from 1.00 to 5.19 over west Texas, the Panhandle, the western portion of north Texas, the eastern portion of county, the central portion of the State, and the western portion of the western counties along the coast, and an excess ranging from 0.00 to 1.00 over the other portions of the State where there was a general deficiency, with the greatest over the eastern portion, where the deficit ranged from 1.00 to 2.00. The rainfall was very unevenly distributed over the State. The greatest monthly amount, 12.70, occurred at Alvin, while none fell at several stations.—I. M. Clute.

Utah.—The mean temperature was 73.2°, or 1.0° above normal; the highest was 107°, at St. George on the 1st and 27th, and the lowest, 30°, at Woodruff on the 23d. The average precipitation was 0.66, or 0.01 above normal; the greatest monthly amount, 3.07, occurred at Grover, and the least, trace, at Blue Creek, Croydon, and Ogden. On June 30th a flood, produced by a very heavy rainfall, accompanied by a strong wind, swept through the mountains, swought down Manti Canyon, swept Mantii, which is located at the foot of the canyon, and damaged buildings and other property to the extent of about $25,000.-E. H. Murdoch.
