North Atlantic.—The Atlantic Ice Patrol reports that ice conditions in the north Atlantic are worse than they have been for many years, large numbers of icebergs being scattered over a wide area.

British Isles.—The month was again one of widespread deficiency of rainfall, less than half the average falling everywhere except in the north and west of Scotland and in Queens County. **

France.—The prolonged dry spell in France, following an unusually dry winter, is causing anxiety as to crops and cattle.

Ice conditions in the north Atlantic are worse than they are usually, with excess of rain in some regions.

General rainfall for June, expressed as a percentage of the average, was: England and Wales, 17; Scotland, 40; Ireland, 24. [Cf. this Review, p. 353.]

Switzerland.—Switzerland has also experienced a hot, dry summer, the rivers being 5 feet lower than usual, but falls of snow at altitudes above 4,500 feet have been reported.

British Honduras.—The Belize district of British Honduras was suffering from severe drought, but floods following a heavy storm were reported from San Salvador on the 11th.

Egypt.—Serious floods following heavy rainfall have affected the cotton and wheat crops in the northeastern part of the Egyptian delta.

India.—The Indian monsoon broke later than usual this year, but by the 22d of the month it was extending normally, with excess of rain in some regions.
