CORRECTION NOTICE

Vol. 96, No. 5, May 1968, pp. 271-272: equations (18), (19), and (20) should read

\[ U_s = -\frac{kU(\Delta z + h)}{h + z_0 + \phi_\theta(\frac{h}{L}) + \int_0^z \phi_\theta(\frac{z}{L}) \, dz} \]  

(18)

\[ \theta_0 = \frac{k(\Delta z + h) - \theta_0}{h + z_0 + \phi_\theta(\frac{h}{L}) + \int_0^z \phi_\theta(\frac{z}{L}) \, dz} \]  

(19)

\[ q_s = \frac{k(\Delta z + h) - q_0}{h + z_0 + \phi_\theta(\frac{h}{L}) + \int_0^z \phi_\theta(\frac{z}{L}) \, dz} \]  

(20)

Also on p. 272 add the following paragraph just above "GROUND TEMPERATURE."

The values of \( K_M \), \( K_H \), and \( K \) obtained from the formulation of Estoque [3] when 0 \( \leq R_c \leq 0.2 \) and the formulations explained above in respect of the other ranges of \( R_c \) are assigned to the level \( z = h \). A linear fall of this value to \( \frac{1}{5} \)th at \( H = 2050 \) m is assumed.
