

CORRIGENDUM

Author Clifford Mass has noticed an error in his March 1982 article “The topographically forced diurnal circulations of western Washington State and their influence on precipitation” (*Mon. Wea. Rev.*, 110, 170–183):

On p. 181 at the top of the right-hand column, the first complete sentence which now begins “The orographic right slope (western side) . . .” should read “The orographic left slope (western side) possesses counter clockwise turning while the orographic right slope (eastern side) possesses clockwise turning.”
