

CORRIGENDUM

Authors M. Bister and K. A. Emanuel report an error in their article “The Genesis of Hurricane Guillermo: TEXMEX Analyses and a Modeling Study,” which appeared in the October issue of *Monthly Weather Review*, Vol. 125, No. 10, 2662–2682.

In Figs. 4 and 5, the long wind barbs are 10 kt and the short barbs are 5 kt. In Fig. 6, however, the long wind barbs are 10 m s^{-1} and the short barbs are 5 m s^{-1} as indicated in the article.
