The authors point out and correct some typographical errors in McFarquhar et al. (2007). In the caption of Fig. 16, the best-fit gamma distribution parameters should be given by $N_0 = 5.5 \times 10^{-3} \text{ cm}^{-(4+\mu)}$, $\lambda = 6.6 \text{ cm}^{-1}$, and $\mu = -0.99$. Also, the units for the vertical axis of N_0 in Figs. 18 and 20 should be $\text{cm}^{-(4+\mu)}$.
