CORRECTION NOTICE

Vol. 96, No. 5, May 1968, pp. 271–272: equations (18), (19), and (20) should read

$$U_*=\frac{kU(\Delta z+h\lambda)}{\frac{\Delta z}{h+z_0}\cdot\phi_M\left(\frac{h}{L}\right)+\int_0^h\frac{\phi_M\left(\frac{z}{L}\right)}{z+z_0}dz} \tag{18}$$

$$\theta_*=\frac{k[\theta(\Delta z+h)-\theta_0]}{\frac{\Delta z}{h+z_0}\cdot\phi_H\left(\frac{h}{L}\right)+\int_0^h\frac{\phi_H\left(\frac{z}{L}\right)}{z+z_0}dz} \tag{19}$$

$$q_*=\frac{k[q(\Delta z+h)-q_0]}{\frac{\Delta z}{h+z_0}\cdot\phi_q\left(\frac{h}{L}\right)+\int_0^h\frac{\phi_q\left(\frac{z}{L}\right)}{z+z_0}dz}. \tag{20}$$

Also on p. 272 add the following paragraph just above "GROUND TEMPERATURE."

The values of K_M, K_H, and K_q obtained from the formulation of Estoque [3] when $0 \leq R_i \leq 0.2$ and the formulations explained above in respect of the other ranges of R_i are assigned to the level $z=h$. A linear fall of this value to $\frac{1}{10}$th at $H=2050$ m is assumed.
