---

There are two instances of an error in [Edson et al. \(2013\)](#). In both the abstract (p. 1589), and in section 2c (first line on p. 1598), the value for  $m$  is incorrect. In both cases, the value should be  $m = 0.0017$ , and not  $m = 0.017$  as originally appeared.

The authors regret any inconvenience this error may have caused.
