

## CORRIGENDUM

ALLAN W. MACAFEE

*National Laboratory for Marine and Coastal Meteorology, Meteorological Service of Canada, Dartmouth, Nova Scotia, Canada*

PETER J. BOWYER

*Canadian Hurricane Centre, Meteorological Service of Canada, Dartmouth, Nova Scotia, Canada*

Three corrections are needed in the review of wind models that was described in section 2 of MacAfee and Bowyer (2005). First, the second line of Eq. (5) on p. 246 should read as follows:

$$V_a = \frac{-X_1 \pm (X_1^2 - 4X_2)^{1/2}}{2}.$$

Second, the text in the first sentence after Eq. (6) on p. 247 should read “. . . where the radially weighted storm speed term was set to unity. . .”

Last, the second line of Eq. (8) on p. 247 should read as follows:

$$\beta = 20^\circ + 25^\circ \left( \frac{R}{R_m} - 1 \right), R_m \leq R < 1.2R_m.$$
