

# Weather and Forecasting

WEATHER AND FORECASTING (WAF) publishes research that is relevant to operational forecasting. This includes papers on significant weather events, forecasting techniques, forecast verification, model parameterizations, data assimilation, model ensembles, statistical postprocessing techniques, the transfer of research results to the forecasting community, and the societal use and value of forecasts. The scope of WAF includes research relevant to forecast lead times ranging from short-term “nowcasts” through seasonal time scales out to approximately two years.

## Chief Editor

GARY LACKMANN  
North Carolina State University

## Editors

JOHN T. ALLEN  
Central Michigan University

BRIAN C. ANCELL  
Texas Tech University

STEPHEN W. BIEDA III
