

# Weather and Forecasting

WEATHER AND FORECASTING (*WAF*) publishes research that is relevant to operational forecasting. This includes papers on significant weather events, forecasting techniques, forecast verification, model parameterizations, data assimilation, model ensembles, statistical postprocessing techniques, the transfer of research results to the forecasting community, and the societal use and value of forecasts. The scope of *WAF* includes research relevant to forecast lead times ranging from short-term “nowcasts” through seasonal time scales out to approximately two years.

## Chief Editor

MATTHEW BUNKERS  
NOAA/NWS Weather Forecast Office Rapid City

## Editors

JOHN T. ALLEN  
Central Michigan University  
WALKER S. ASHLEY  
Northern Illinois University  
STEPHEN W. BIEDA III  
NOAA/NWS Analyze, Forecast and  
Support Office  
KRISTIN M. CALHOUN  
University of Oklahoma and NOAA/National  
Severe Storms Laboratory
