

Supplemental Material for
Optimal Ranking Regime Analysis of Intra- to Multidecadal U.S. Climate
Variability. Part II: Precipitation and Streamflow

in final form 11 September 2014)

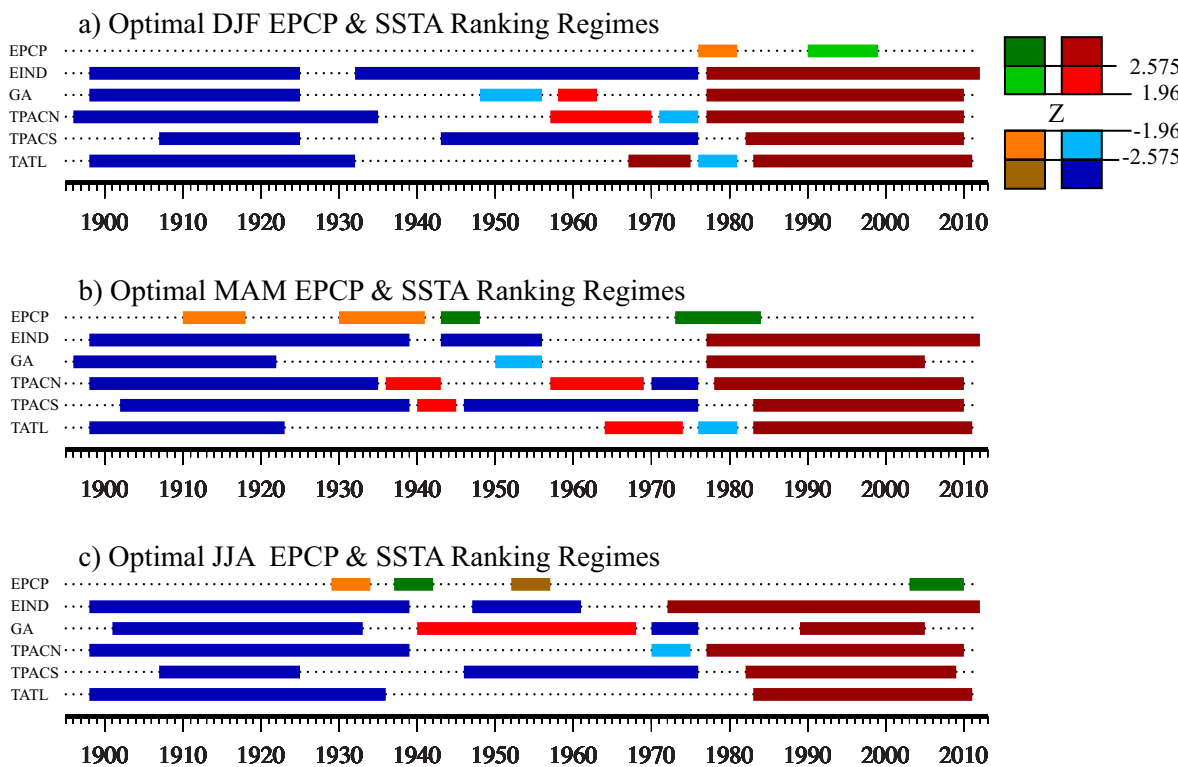

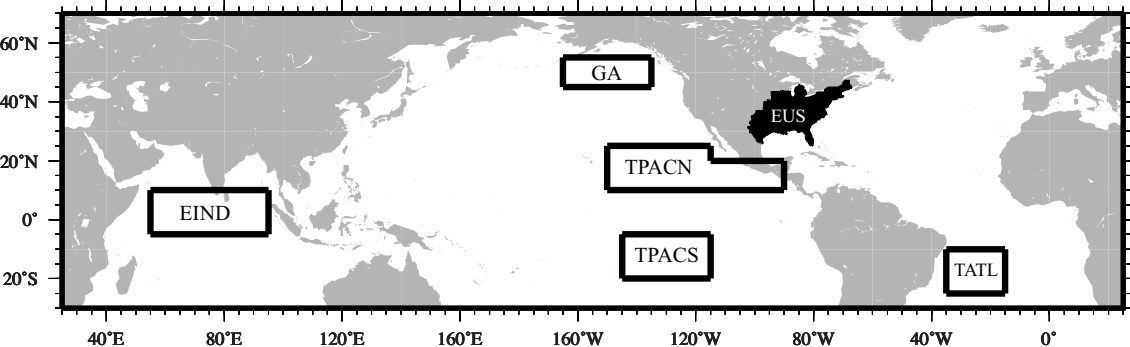

Figure S1. Counterpart figures for Fig. 10h in the text for winter (DJF), spring (MAM), and summer (JJA) seasons. a) The optimal ranking regimes during 1896-2012 for winter precipitation averaged over the EUS region (EPCP) and winter SSTA averaged over the five outlined grid regions at the top. b) As in (a) for spring optimal ranking regimes. c) As in (a) for summer optimal ranking regimes.
