Supplementary Figures to: The sea-level response to external forcings in historical simulations of CMIP5 climate models

A. B. A. Slangen, J. A. Church, X. Zhang and D. Monselesan

List of Supplementary Figures

S1 Linear DSL trend (1861–2005) of the first realisation of each model in the natural-only ensemble (mm yr\(^{-1}\)). ................................. 2
S2 Linear DSL trend (1861–2005) of the first realisation of each model in the greenhouse gas only ensemble (mm yr\(^{-1}\)). ................................. 3
S3 Linear DSL trend (1861–2005) of the first realisation of each model in the anthropogenic aerosol-only ensemble (mm yr\(^{-1}\)). ................................. 4
S4 Linear DSL trend (1861–2005) of the first realisation of each model in the anthropogenic-only ensemble (mm yr\(^{-1}\)). ................................. 5
S5 Linear DSL trend (1861–2005) of the first realisation of each model in the historical ensemble (mm yr\(^{-1}\)). ................................. 6
Figure S1: Linear DSL trend (1861–2005) of the first realisation of each model in the natural-only ensemble (mm yr$^{-1}$).
Figure S2: Linear DSL trend (1861–2005) of the first realisation of each model in the greenhouse gas only ensemble (mm yr$^{-1}$).
Figure S3: Linear DSL trend (1861–2005) of the first realisation of each model in the anthropogenic aerosol-only ensemble (mm yr$^{-1}$).
Figure S4: Linear DSL trend (1861–2005) of the first realisation of each model in the anthropogenic-only ensemble (mm yr$^{-1}$).
Figure S5: Linear DSL trend (1861–2005) of the first realisation of each model in the historical ensemble (mm yr\(^{-1}\)).
