Because of a production error, Fig. 8 was incorrectly displayed in black and white in Morrison et al. (2005). The color version of Fig. 8 that should have appeared is shown below.

The Journal of the Atmospheric Sciences regrets any inconvenience this error may have caused.

REFERENCE

**Fig. 8.** Schematic depicting hurricane boundary layer rolls observed during four hurricane landfalls. Streamline arrows indicate transverse flow, with high (low) momentum air being transported downward (upward). Shaded arrows and bold contours indicate the positive (red) and negative (blue) residual velocities [R. Foster 2004, personal communication; after Brown (1974) and WW98].
