Certified Consulting Meteorologist: The certification program of the American Meteorological Society is aimed at fostering the establishment and maintenance of a high level of professional competency, and mature and ethical counsel, in the fields of consulting meteorology. Requirements of knowledge, experience, and character are determined by a five-man Board. Objectives of the program and application procedures are described in full detail in the August BULLETIN (pp. 880–882).

The Seventh Conference on Inadvertent and Planned Weather Modification, sponsored by the American Meteorological Society and cosponsored by the American Society of Civil Engineers and the Weather Modification Association, was held 8–12 October 1979 in Banff, Alta., Canada.

Sessions on “Design and Evaluation” were held jointly with the Sixth Conference on Probability and Statistics in Atmospheric Sciences and included such topics as:

- Statistical methodology
- Evaluation of operational programs
- Plans and designs
- Evaluations and reanalyses
- Structure of experimentation

Over 130 extended abstracts are arranged under the sessions listed above and the following sessions:

- Inadvertent weather modification
- Societal aspects
- Transport and diffusion of seeding material
- Modification of winter cloud systems
- Analysis and instrumentation techniques
- Precipitation estimation techniques
- Modification of convective cloud systems
- Predictor variables and covariates
- Program implementation aspects
