CORRIGENDUM

CHIA-YING LEE* AND SHUYI S. CHEN

Rosenstiel School of Marine and Atmospheric Science, University of Miami, Miami, Florida

(Manuscript received and in final form 3 October 2014)

The following sentence, which appeared in the accepted version of Lee and Chen (2014), was incorrectly removed during page proofs by the authors:

Although the composite inflow angle in a storm-relative coordinate using dropsondes collected in the Atlantic hurricanes by Zhang and Uhlhorn (2012) showed that the inflow angles are larger in the front-right quadrant in fast-moving storms, variability from storm to storm is large.

This sentence should appear in section 6c on p. 1939, following “The horizontal pattern of inflow angles can vary from storm to storm.”
