The Journal of Climate (JCL) publishes research that advances basic understanding of the dynamics and physics of the climate system on large spatial scales, including variability of the atmosphere, oceans, land surface, and cryosphere; past, present, and projected future changes in the climate system; and climate simulation and prediction.

Co-Editors

ISLA SIMPSON
University Corporation for Atmospheric Research

DARREY WAUGH
The Johns Hopkins University

Editors

QINGHUA DING
University of California, Santa Barbara

DEITMAR DOMMENGET
Monash University

MICHAEL N. EVANS
University of Maryland

MERCEDES GIRONDE
NOAA/Physical Sciences Laboratory

PANG-CHU HSU
Nanjing University of Science and Technology

XIAOLEI HUANG
University of Michigan

ROBERT INGOLDSBY
University of Washington

JENNIFER E. KAY
University of Colorado Boulder

DAEZHYUN KIM
University of Washington

YU KOSAKA
University of Tokyo

CHARLES KOVEN
Lawrence Berkeley National Laboratory

JOHN LANCANTE
NOAA/Geophysical Fluid Dynamics Laboratory

SARAH LARSON
North Carolina State University

MATHIEU LANGAGNE
Institut de Recherche pour le Développement

NATHAN LENZEN
Colorado School of Mines

LAIFANG LI
The Pennsylvania State University

XUEHUI LI
Institute of Atmospheric Physics, Chinese Academy of Sciences

TAO LIAN
Second Institute of Oceanography, Ministry of Natural Resources

FEI LI
School of Atmospheric Sciences, Sun Yat-sen University, China

PAUL LOGHETTI
Portland State University

RYU LI
LASG, Institute of Atmospheric Physics, Chinese Academy of Sciences

JUSTIN S. MANKIN
Dartmouth College

KAREN MCKENNON
University of California, Los Angeles

BRIAN MEDeiROS
Univrsity Corporation for Atmospheric Research

TIMOTHY MERLIS
Princeton University

OMAHI MIAWAKI
National Center for Atmospheric Research

VINCENT MORDOY
Department of Geography and Planning, Aix-Marseille University

HIROYUKI MIURA
NOAA/Geophysical Fluid Dynamics Laboratory

KATHE PEGION
University of Oklahoma

BING PO
University of Kansas

INGO RICHTER
Jagan Agency for Marine-Earth Science and Technology

JON ROBSON
National Centre for Atmospheric Science, University of Reading

BENJAMIN R. RINTNER
University of New South Wales

KEVIN REED
Stony Brook University

SHAWN MARSHALL
University of Calgary

SEUNG-KI MIN
Pohang University of Science and Technology

JULI NORMS
University of California, San Diego

YUKO OKUMURA
The University of Texas at Austin

IVY TAN
McGill University

NUR TANDON
York University

GABRIELE VILLARI
Department of Civil and Environmental Engineering and High Meadows Environmental Institute, Princeton University

HANS VON STORCH
GKSS Research Centre

CASEY WALL
University of Oslo

HEI WANG
NOAA/Climate Prediction Center

LEI WANG
Fudan University

LI WANG
Institute of Atmospheric Physics, Chinese Academy of Sciences

LU WANG
Nanjing University of Information Science & Technology

ZHUI WAN
School of Atmospheric Sciences, Sun Yat-sen University

YUTAO WANG
Fudan University

RENQIANG WU
Zhejiang University

XIAN WU
Princeton University

HAILAN WANG
Lamont-Doherty Earth Observatory of Columbia University

SHAOCHENG XIE
Lawrence Livermore National Laboratory

DA YANG
University of California, Davis

SANG-WOOK YEH
Hanyang University

YURA YUI
Geophysical Fluid Dynamics Laboratory

QING YUE
Jet Propulsion Laboratory, California Institute of Technology

GAN ZHANG
University of Illinois at Urbana-Champaign

LEI ZHANG
South China Sea Institute of Oceanology, Chinese Academy of Sciences

LIPING ZHANG
Geophysical Fluid Dynamics Laboratory

PENGFEI ZHANG
The Pennsylvania State University

RENHE ZHANG
Fudan University

YANG ZHANG
Nanjing University

HAIKUN ZHAO
Nanjing University of Information Science and Technology

CHENG ZHENG
Lamont-Doherty Earth Observatory

YOUTONG ZHENG
University of Houston
